

263-2300-00: How To Write Fast Numerical Code

Assignment 0

Due Date: As soon as possible

<https://acl.inf.ethz.ch/teaching/fastcode/2019/>

Email: fastcode@lists.inf.ethz.ch

This homework has no points (wait, you should still read on)

1. If you have not done so yet, please read through the course website (the url is above) and the slides from the first lecture
2. Form a team of four people and email the names (email address above). You can use the fastcode-forum mailing list (see slides from first lecture).
3. Think of a suitable project and suggest it by email or in person after class to the instructor for approval
4. You can check out projects from the past iterations of this course (that does not mean that the idea is to replicate them)
5. Once you have an approved project topic you should register it at <https://medellin.inf.ethz.ch/courses/263-2300-ETH/>

The team building and project determination should be completed by March 4th.
